

**Capability  
Statement**

**MMS is your proven and trusted mining partner, providing flexible, tailored solutions backed by a fleet of 200+ owned assets, integrated support teams, and a strategic approach.**

**Our expertise ensures we deliver on every project.**

## Why MMS?

# Because Results Matter.

Mining success demands the right partner. A partner who understands your challenges and has the expertise, agility, and commitment to deliver exceptional results. **That partner is MMS.**

We're results-driven, with a proven track record built on strong relationships, technical excellence, and a "Get It Done" mentality.

Here's why you should choose MMS:

- > **Strong Relationships:**  
We build lasting partnerships based on trust and open communication.
- > **Technical Excellence:**  
Our expert in-house team provides innovative solutions for mine planning, engineering, geological modelling, and resource estimation.
- > **Extensive Experience:**  
Our leadership team has over 100 years of combined industry experience, providing strategic guidance.
- > **Results-Driven:**  
We focus on execution and delivering on promises, on time and within budget.
- > **Agility and Flexibility:**  
We adapt to changing needs, offering flexible solutions from contract mining to joint ventures.
- > **Rapid Response:**  
We pride ourselves on rapid response times and efficient mobilisation.
- > **Strategic Fleet Management:**  
We proactively manage our modern fleet and acquire new equipment as needed.
- > **Efficient Decision-Making:**  
Our streamlined structure enables rapid decisions and efficient project execution.
- > **Joint Venture Expertise:**  
We excel at structuring and managing joint ventures.

Our results speak for themselves, consistently delivering outstanding outcomes for our clients.

## Who we are

# Let's get it done.

**At MMS, we're more than a mining services provider—we're your strategic partner in achieving mining success.**

As a proud Western Australian business, our foundation is built on strong relationships, experienced leadership, and a "Get It Done" mentality. We understand that trust and collaboration are essential, and our skilled professionals embody these values.

Our success comes from simplifying mining and exceeding expectations, leading to happy clients and exceptional results. We take ownership, ensuring we deliver on our commitments. This dedication, coupled with rapid response times and a proactive approach, has fuelled our rapid growth, and solidified our reputation as a reliable, results-driven partner.

## Our Values

### Safety

People and their safety always comes first.

### Teamwork

We always work together and support each other.

### Respect

We value all people and are committed to treating them with dignity and fairness.

### Sustainability

Committed to pursuing growth in a responsible manner.

### Performance

We always deliver high-quality, effective and efficient solutions.

## Our Leadership

**Rob Ryan**  
Chief Executive Officer

With his extensive experience in the mining sector, Rob has a proven track record of leading successful projects and driving business growth. His strategic vision and unwavering commitment to excellence are instrumental in guiding MMS's continued success.

**David Smith**  
Chief Operating Officer

David brings a wealth of operational expertise to MMS, ensuring efficient and effective project execution across all areas of the business. His leadership and focus on optimisation drive continuous improvement and maximise productivity.

**Beau McCarthy**  
Chief Financial Officer

Beau is a highly experienced finance professional with a strong background in the mining and logistics sectors. He brings extensive expertise in financial reporting, treasury management, and cost optimisation to MMS, strengthening financial performance and driving operational efficiency.

**Jason Walker**  
General Manager Mining

Jason brings over 20 years of experience in the mining industry to MMS, encompassing exploration, drill and blast, operations, and extensive leadership experience. He specialises in developing tailored solutions for challenging mining projects, from planning through execution, and excels at building high-performing teams.

**Nathan Ramm**  
Head of Technical Services

Nathan leads MMS's technical team, providing innovative solutions and expert advice to our clients. His technical expertise and commitment to continuous improvement ensure MMS remains at the forefront of the industry, leveraging the latest technologies and best practices.

**Brent Clinch**  
Chief Marketing Officer

Brent brings over 16 years of marketing experience, including a deep understanding of the mining industry, to MMS. His strong leadership and business acumen, combined with a passion for building strong brands through market research and client knowledge, ensures customers are always at the heart of every initiative.

## What we do

# The MMS Difference.

We focus on results and project execution, offering comprehensive mining solutions backed by a skilled workforce, modern fleet, and unwavering commitment to safety.

MMS executes projects efficiently, taking ownership through meticulous planning and resource availability. Our understanding of project requirements and "can-do" attitude enables us to deliver outstanding results at any project level.

We offer:

**In-House Expertise:**

Complete project execution understanding, from scoping and planning to ore delivery.

**Strategic Approach:**

We anticipate challenges and plan for contingencies, maximizing uptime and efficiency.

**Tailored Solutions:**

We adapt to your specific needs, providing the right people, plant, and support.

### Solutions

### Results

### Expertise

## Our Mining Solutions

### Load & Haul Services

Complete mining solutions.

### ROM Management – ROM Loaders

Full support of payload technology on equipment.

### Transport & Mobilisation

Mobilisation and demobilisation with a fleet of floats.

### Mine Production Management

Full mine management, supervision and organisation.

### Drill & Blast Management

Management of drill and blast subcontractors.

### Mine Costing & Assistance

Accurately scoping the requirements for load and haul services.

### Mine Technical Support

Capabilities to provide technical services and evaluations.

### Mechanical Field Service Support

24/7 support onsite assistance available.

### Equipment Mechanical Servicing, Repairs & Rebuilds

Maintenance of old and new equipment

# In-House Technical Services Team

**MMS's dedicated technical services team provides expert advice and solutions across all project stages.**

Our experienced professionals possess in-depth knowledge and expertise in:

- > **Mine Planning and Engineering:**  
Optimising mine design, infrastructure, and scheduling for maximum efficiency and productivity.
- > **Geological Modelling and Resource Estimation:**  
Accurately assessing and defining orebodies to inform strategic decision-making and resource management.
- > **Operational Optimisation:**  
Developing and implementing strategies to improve productivity, reduce costs, and enhance safety across your operations.

This in-house capability ensures rapid response times and solutions tailored to your specific needs. It's an integral part of our commitment to providing comprehensive mining solutions that deliver exceptional value and drive success.

our trusted mining pa

### **Huanru Si**

Mr Si is a professional mining engineer with +15 years of mining experience. Before joining MMS, he has worked across the mining sector in operations and consultancies throughout Western Australia (iron ore, nickel, and gold) in the field of open pit planning, scheduling, pit optimisation, software development, consulting, training, cost modelling and budgeting.

### **Nathan Ramm**

Nathan is a mining professional with +15 years of open pit mining experience including all facets of mining engineering and management roles. Mr Ramm has held the position of General Manager – Mining Operations at Nathan River Resources iron ore operations, plus held Open Pit Manager roles across WA in different commodities.

### **Emma Edwards**

Ms Edwards is a geologist with 15+ years of experience in mining and exploration, spanning gold, iron ore, and lithium. She has a strong background in resource development, optimising recovery, and driving operational excellence. Ms Edwards has held operational and corporate roles, leading multidisciplinary teams and contributing to significant resource growth.

## Workshop Support: **Keeping You Operational**

MMS's 10,000m<sup>2</sup> Bibra Lake operations hub provides comprehensive workshop support for our extensive fleet and specialised mining equipment. Our experienced team of heavy diesel fitters and technicians ensures all equipment is maintained to the highest standards, maximising your site efficiencies and minimising downtime.

Our workshop capabilities include:

- > Dedicated workshops for boilermakers and heavy vehicle servicing.
- > Machine rebuilds and restorations.
- > Mechanical equipment servicing.
- > 24/7 mechanical support.

We operate a robust asset management system, ensuring meticulous maintenance and repairs. Our commitment to quality workshop support translates to increased operational productivity and enhanced safety outcomes for our clients. We understand that reliable equipment is critical to your success, and our workshop is a cornerstone of that commitment.

## What we have

# The Right Equipment, Strategically Deployed.

Our fleet isn't just a collection of machines – it's a carefully curated fleet, strategically built to handle the challenges faced by mining operations. We tailor our equipment to the specific demands of each project, ensuring optimal performance and minimising downtime.

**Strategic Fleet Composition:**  
We invest in equipment that's proven, reliable, and backed by readily available parts and support.

**24/7 Mechanical Support:**  
Our dedicated maintenance teams ensure maximum uptime, keeping your project on track.

**Scalable Solutions:**  
Whether you need a single machine or a full fleet, we offer flexible options to match your project's evolving needs.
